Wazuh Setup

Saturday, February 15, 2025   5:19 PM

Installation of Wazuh:

1. Download and run the Wazuh installation package on Ubuntu
   (curl -sO https://packages.wazuh.com/4.10/wazuh-install.sh && sudo bash ./wazuh-install.sh -a)
   Note: Run = sudo su for root privileges
   Note: I had problems installing the regular installation with the instructions, so I entered this following command instead which it worked> sudo bash ./wazuh-install.sh -a

   Once the installation has been finished, You should see the output credentials that it provided for you:

   INFO: --- Summary ---
   INFO: You can access the web interface https://<WAZUH_DASHBOARD_IP_ADDRESS>

- User: admin
- Password: <ADMIN_PASSWORD>
- INFO: Installation finished.

2. To Access the Web server you type > The following IP address onto your Ubuntu Terminal > ip a

   Once you've been directed onto the website, you can simply login
   - Username: admin
   - Password: (The password it gave you, when installing Wazuh)
   - Note: When you log in for the first time, it will show you a warning message. The web server is a self-signed certificate website.
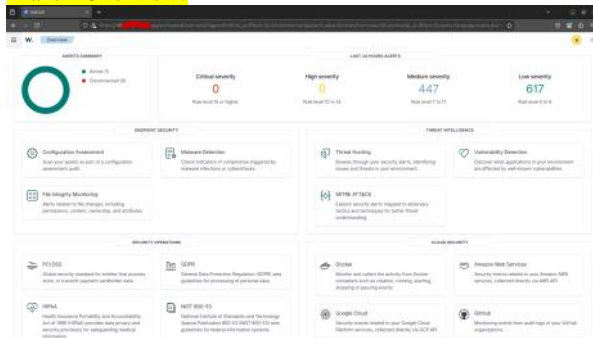

Warning Message:
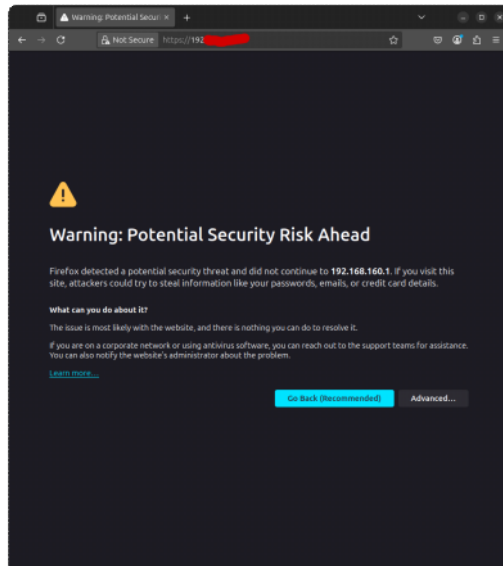

Admin Login:
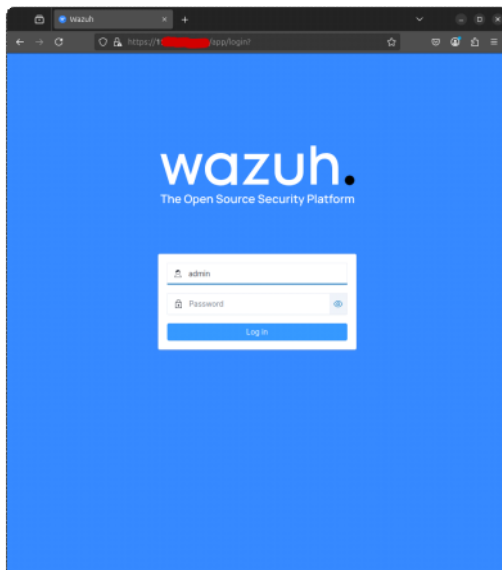

Wazuh Dashboard:

On the dashboard it shows on my Windows 10 enviorment what passed, why it failed, and how are some components not applicable.
